Arginex®

Arginex Contains the Cleansing Properties of Buckwheat, Pea Vine, and Beet Juices to Promote Blood Purification

The kidneys serve as the primary filtration system for our blood by removing waste material from it and then disposing the debris through urination. The urinary system is a complex network and resorption system made up of over two million nephrons. The nephrons, in turn, are comprised of glomeruli and renal tubules that extract urea, salts, and all other soluble wastes from blood plasma under high pressure before returning the refined filtrate to the blood. Blood is made up of four different parts: plasma, red and white blood cells, and platelets. These four different parts of our blood each help sustain life by consistently performing their unique functions. If any of these operations are compromised in some way, it can have a direct consequence on overall health. A lack of important nutrients in the diet can diminish the kidneys’ filtration efficiency and impair the blood’s ability to perform its designated tasks. Each nutrient in Arginex provides a natural aid to help the kidneys remove metabolic by-products and toxins from the blood.†

How Arginex Keeps You Healthy

Keeps your blood cleaner and promotes healthy blood vessels

Specific nutrients help maintain healthy cholesterol and saturated fat in the blood. Oat flour contains niacin, lecithin, and vitamin E to assist in removing residual fats from the blood. The high-fiber content of oats boost its ability to reduce plaque buildup on arterial walls. Buckwheat contains rutin to help keep arterial vessels healthy. The tissue of the tillandsia plant can help promote healthy blood-sugar levels. Beets support blood purification.†

Keeps your heart healthy

Beets and oats help strengthen the heart muscle and improve circulation to help maintain vascular health.†

Supports renal function

The nutrients in Arginex work to help the kidneys remove metabolic waste from the blood.†

What Makes Arginex Unique

Unique Product Attributes

Contains distinctive enzyme complexes from buckwheat juice and seed, pea vine juice, oat flour, bovine liver, and beet root with a special yeast strain of *Rhizopus oryzae*

- To support the cleansing ability of the kidneys†
- Multiple nutrients from a variety of plant and animal sources
  - Bovine tissues provide nutrients and support to the corresponding tissues in humans
  - Vitamins, minerals, and nutrients from plants and animal tissues work synergistically for maximum effect†

Certified Organic Farming

A healthy ecosystem is created by using organic farming techniques, such as rotating crops, fertilizing the soil with nutrient-rich cover crops and by-products from our processing, practicing strict weed control standards, and continually monitoring the health of our plants

- Assures the soil is laden with minerals and nutrients
- Ensures plants are nutritionally complete and free from synthetic pesticides

Unique Processing

Upon harvesting, nutrient-rich plants are immediately washed and promptly processed

- Preserves nutritional integrity

Exclusive low-temperature, high-vacuum drying technique

- Preserves the enzymatic vitality and nutritional potential of ingredients

Not disassociated into isolated components

- The nutrients in Arginex are processed to remain intact, complete nutritional compounds

Degreed microbiologists and chemists in our on-site laboratories constantly conduct bacterial and analytical tests on raw materials, product batches, and finished products

- Ensures consistent quality and safety

Vitamin and mineral analyses validate product content and specifications

- Assures high-quality essential nutrients are delivered

Proprietary Blend:

Dried buckwheat juice, buckwheat (seed), dried pea (vine) juice, oat flour, bovine liver, beet (root), extract of *Rhizopus oryzae* grown on Tillandsia usneoides and beet (root), dried beet (leaf) juice, and ascorbic acid.

Other Ingredients: Honey, calcium stearate, vitamin A palmitate, and gelatin.

Suggested Use: One tablet per meal, or as directed.

Sold to health care professionals.

Whole Food Philosophy

Dr. Lee challenged common scientific beliefs by choosing a holistic approach of providing nutrients through whole foods. His goal was to provide nutrients as they are found in nature—in a whole food state where he believed their natural potency and efficacy would be realized. Dr. Lee believed that when nutrients remain intact and are not split from their natural associated synergists—known and unknown—bioactivity is markedly enhanced over synthetic nutrients. Following this philosophy, even a small amount of a whole food concentrate will offer enhanced nutritional support, compared to a synthetic or fractionated vitamin. Therefore, one should examine the source of nutrients rather than looking at the quantities of individual nutrients on product labels.

Studies on nutrients generally use large doses and these studies, some of which are cited below, are the basis for much of the information we provide you in this publication about whole food ingredients. See the supplement facts for Arginex®.
